### DETAILED ACTION

This application has been examined. The claims 27, 29 and 31 are allowed.

#### *Reasons For Allowance*

1. The following is an examiner's statement of reasons for allowance: The present invention is directed to a computer system having a central processing unit (CPU), and a display apparatus coupled to the CPU, the computer system comprising: an input section operable to present a zoom factor to a user, the zoom factor specifying a pre-determined magnification amount for zooming in on an image displayed on a display screen of the display apparatus and being a number equal to a first resolution of the display apparatus divided by a second resolution of the display apparatus, the input section further operable to receive user input selecting the zoom factor. The combination of the closest prior art of Vouri et al. (US 5,420,605) and Matthews III et al. (US 6,344,865) showed a similar invention, however, they fail to teach wherein the image is displayed within an activate window and the resolution changing unit is operable to zoom in on the image displayed on the display screen by resizing the active window, and wherein a size of an inactive window being displayed on the display screen remains unchanged irrespective of the resolution change of the display apparatus from the first resolution to the second resolution as claims 27, 29 and 31.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled. "Comments on Statement of Reasons for Allowance."
